# EFFICIENT BIZJET CARE

Aircraft Management  
Commercial Operation  
Aviation Consulting  
CAMO+  
Flight Support

## Unlimited Possibilities

The business jet is an effective alternative to commercial airline service that encourages in-flight productivity and gets corporate managers or private individuals to locations far more quickly than airlines can.

Accompanied by partners, friends or relatives, you have access to many more airports than a commercial airline, in far more comfortable conditions, leaving the difficult airport formalities on the shoulders of a fixed base operator.

Flexibility, dynamism and efficiency - the business jet is a work tool. MJET is specialized in managing business jets and making sure that your business jet becomes one of the tools to enhance your success and the success of your business. MJet has the expertise to make this tool work as efficiently as possible.

### Company Facts & Figures:

Established  
2007

Area of operation  
Worldwide

Headquarters  
Vienna, Austria

Operational bases  
Vienna  
Geneva  
Kyiv  
Moscow  
St. Petersburg

## Operational Certifications:

### Austria

Operating Licence,  
Air Operator Certificate,  
CAMO+

### Foreign

FAR Part 129

### Other Approvals

Low Visibility Ops  
(CAT II, CAT IIIa),  
EFB

Austro Control,  
EASA,  
various financial  
institutions

## HIGH VALUES AND STANDARDS

To manage your valuable asset, to buy a new aircraft, to replace a used one, or to arrange a safe and comfortable charter flight... Just contact us and we will serve you in the best possible way!

Enjoy the benefits and control of having your own aircraft, while it is entrusted to an experienced team of professionals, whose standards of excellence are unsurpassed.

With our expertise and knowledge in managing any type of aircraft, we would be happy to offer a personalized package of aircraft management services.

Our goal is to serve you in the most efficient way!

### PROFILE

AviSwiss is specialised in the areas of quality assurance and risk analysis, the provision of consulting and project management services for aircraft and helicopter acquisition and operation in the airline, corporate and executive aviation industry and the development and distribution of IT-based support tools for the aviation industry.

#### Our Mission

The company strategy is:

- dedicated focus on fulfilling customer-specific requirements
- decades of qualified experience and know-how
- independence from manufacturer commitments

The company reputation and close co-operation with the aviation authorities worldwide underline our commitment to quality and compliance.

#### Our Vision

Our goal is to define, develop and implement the best possible solution for clients.

### HIGHLIGHTS

#### Flight Data Monitoring

- FDM Services provider for a wide range of different aircraft type.
- Integrated risk assessment
- Visualisation of flight path and events

#### Supporting Software Tools

- E-Manual and IT Reporting System with integrated risk assessment
- Web based Flight Risk Assessment
- Audit Management System

#### Quality Safety and Management System

- Flight Safety and Accident prevention
- Risk Assessment
- Quality Assurance
- Emergency Response Management

>  
financing sourcing  
>  
pre-delivery management  
>  
inspection and delivery  
>  
contract management  
>  
budget control and cost  
reduction  
>  
commercial or private  
operation

## Advanced Management Solutions

Identifying, purchasing and delivering an aircraft – it is a complex process which requires knowledge, experience and infrastructure. If time is your most valuable resource, the right step is to entrust the process to aviation professionals. We make sure that you get the most pertinent advice, in order for you to decide how your investment will be handled with the best efficiency.

The regulatory burden of tracking operational and administrative tasks to register and safely operate a bizjet is our business. The requirements to track maintenance and expenses, the challenge of hiring and supervising crew and the awareness to remain updated of constant changes in aviation regulations can be overwhelming. We know the process in detail!

## Know-how and in-house services:

commercial operation  
[Ops 1 & Part 129]

SQMS  
[safety & quality  
management]

CAMO+  
[incl. ARC]

flight support and  
dispatch  
[24/7 service]

crew management  
[incl. training]

asset management  
[incl. aircraft  
deliveries]

Commercial or private aircraft management – it's your choice. We are able to manage both types of operation and it's our job to provide you with the best advice and efficiency.

MJET means access to a complete range of aviation-related services, including consulting, financing, aircraft inspections and deliveries, crew and dispatch training etc.

If you already have a manager for your in-service aircraft, check out our operations support services, consisting of:

- ▲ flight support package, available to you 24/7/365, from flight planning to completion;
- ▲ CAMO+services, allowing us to manage the continuing airworthiness of your aircraft and issue recommendations or Airworthiness Review Certificates following an Airworthiness Review;

## Fokker

POWERED BY ROLLS-ROYCE

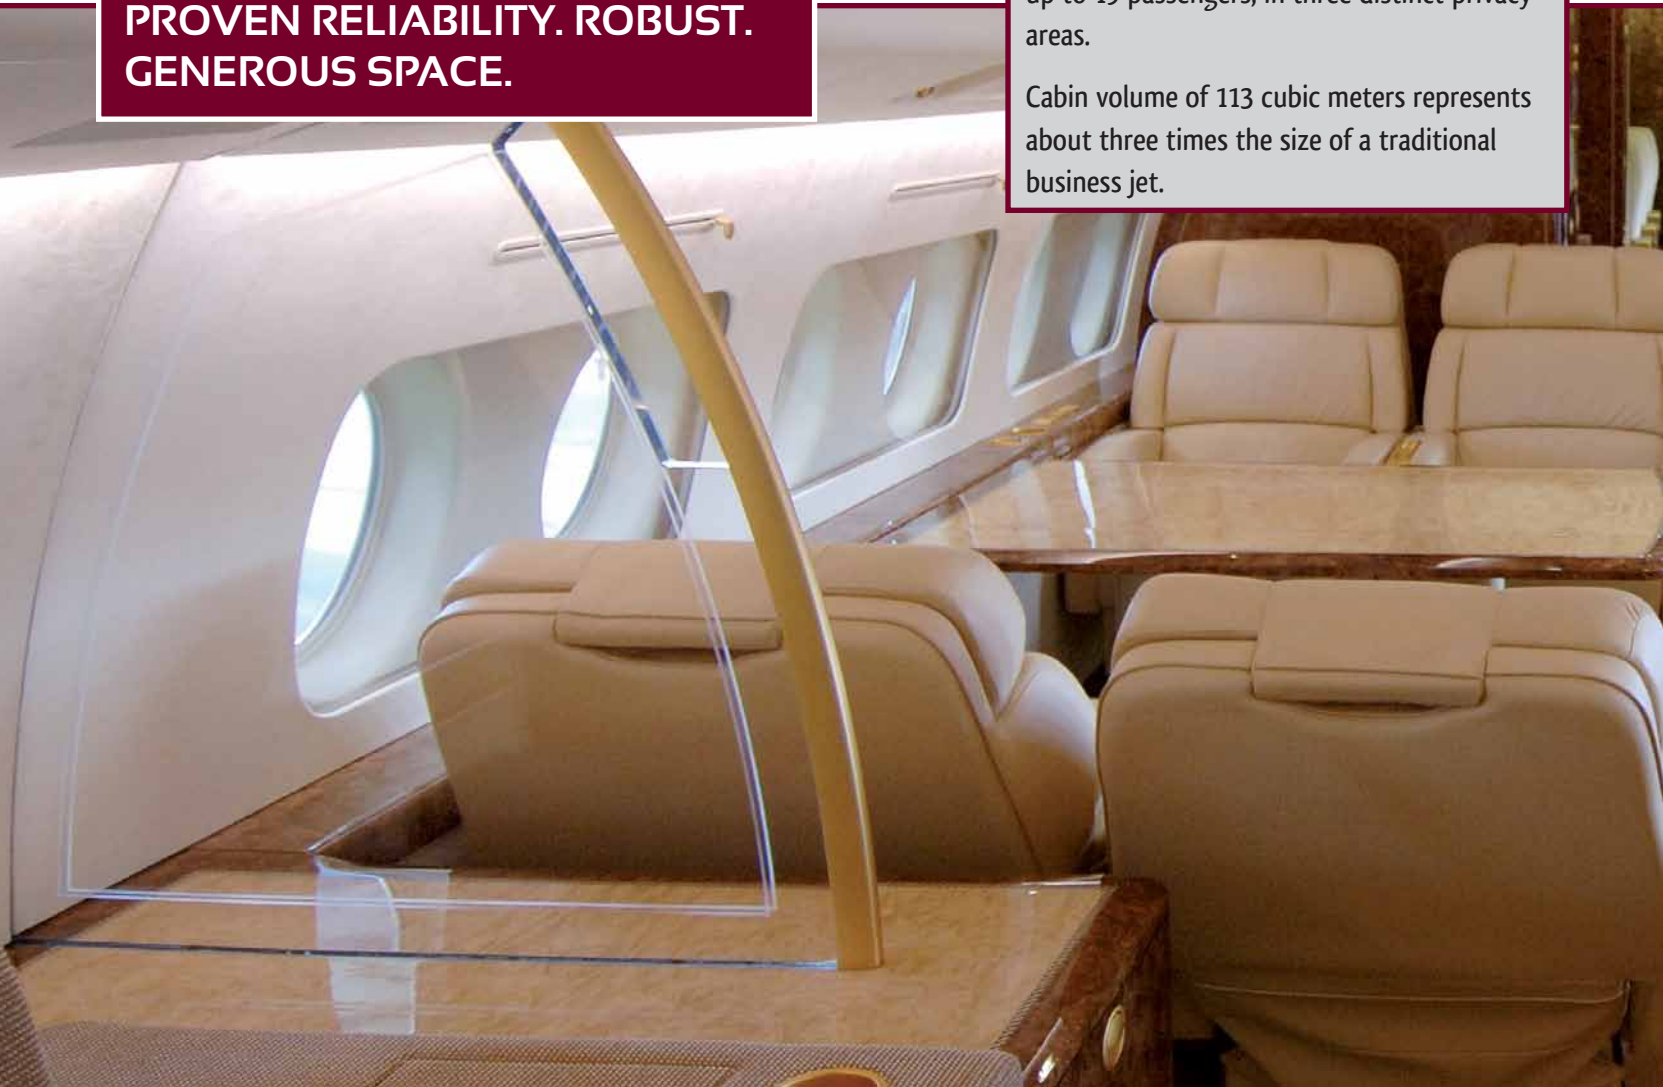

| TYPE                     | Fokker 100 Executive Jet  |
|--------------------------|---------------------------|
| Range                    | 4,800 km                  |
|                          | mid-range                 |
| Long range cruise speed  | Mach 0.70 (740 km/h)      |
| Mmo                      | Mach 0.77                 |
| Cabin dimensions (L/W/H) | 20.80 / 3.08 / 1.95 m     |
| Seats                    | 19 (28 for private ops)   |
| Engines                  | Rolls-Royce<br>Tay 650-15 |

The Fokker 100EJ is the result of an extraordinary modification project finalized in 2007, which gave us the opportunity to operate 3 exclusive VIP aircraft with a generous cabin space and low operating costs.

The Fokker 100EJ is an excellent solution for corporate customers who seek fast and safe connections in a comfortable environment for up to 19 passengers, in three distinct privacy areas.

Cabin volume of 113 cubic meters represents about three times the size of a traditional business jet.

PROVEN RELIABILITY. ROBUST.  
GENEROUS SPACE.

# ATB

Austrian Technik Bratislava

## ADVANTAGES OF OUR PARTNERSHIP

Our Location in the Heart of Europe makes us easily accessible from nearly every region in and around Europe, saving travel time and fuel costs.

With skilled technicians who have an average of 10 years experience in the industry we have enough heavy maintenance experience on Fokker 70/100 Aircraft to predict common findings and advise our customers of possible future outcomes and system behaviours.

By implementing creative and flexible methods of service we can offer nearly everything the F70 and F100 could need. Our system provides the freedom to fully meet our customer's expectations without the limitations of a large MRO with rigid practices.

We feel that our customer-focused attitude combined with our competitive prices gives ATB an advantage in the MRO market. We thrive on customer satisfaction and have structured our operation to be as straightforward as possible to find solutions quickly.

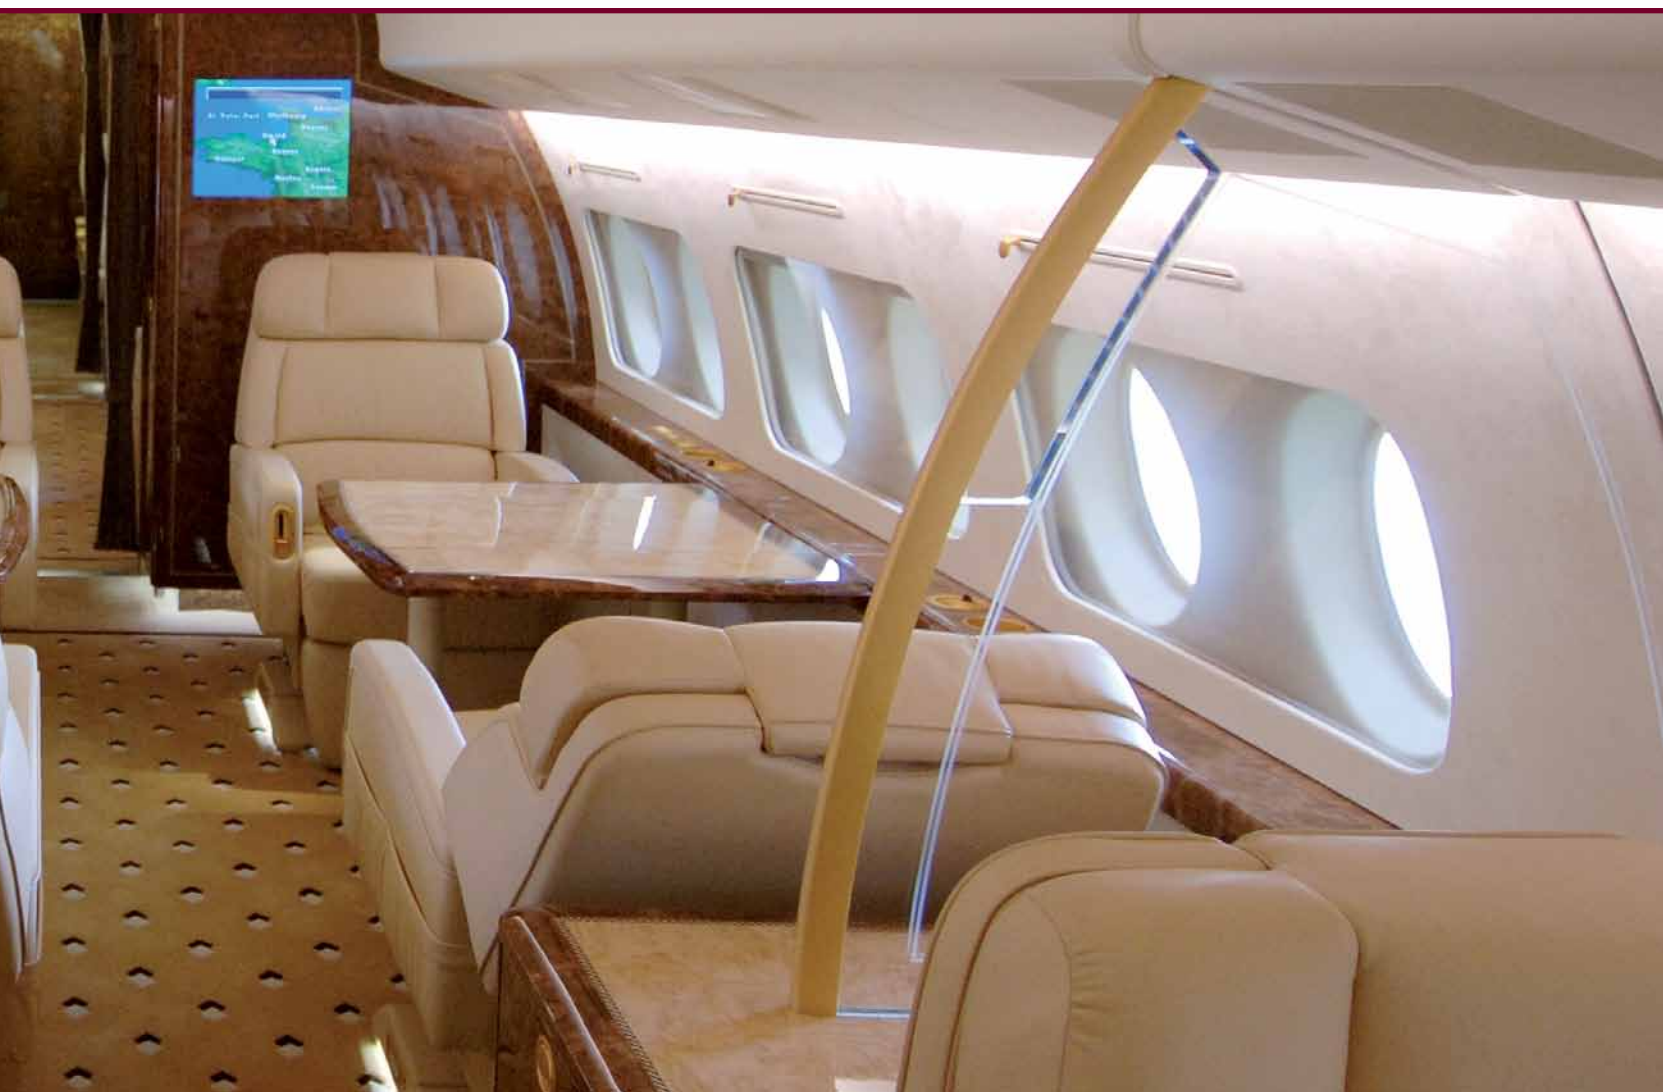

Our facility provides our customers with an easy-to-navigate floor plan. There is nothing worse than getting lost in a sea of doors and hallways. We keep our customers close to their Aircraft and to our staff at all times.

# SUPER-MID-SIZE CABIN

## Gulfstream

POWERED BY PRATT & WHITNEY CANADA

| Performance              | Gulfstream G200             |
|--------------------------|-----------------------------|
| Range                    | 6,300 km                    |
|                          | long range                  |
| Long range cruise speed  | Mach 0.75 (800 km/h)        |
| Mmo                      | Mach 0.85                   |
| Cabin dimensions (L/W/H) | 7.44 / 2.18 / 1.91 m        |
| SEATS                    | 09-10                       |
| ENGINES                  | Pratt & Whitney Canada 306A |

Gulfstream G200, formerly known as Galaxy Business Jet, is an aircraft which has redefined the midsize class in business aviation. It has the largest cabin in the super-mid-size jet category, as well as the longest range.

With an impressive rate of climb, a high speed cruising altitude and the ability to handle shorter runways, this bizjet is a solution for short to medium duration flights as well as transatlantic routes.

EFFICIENT. SUPERIOR.  
WORLD-CLASS PERFORMANCE.

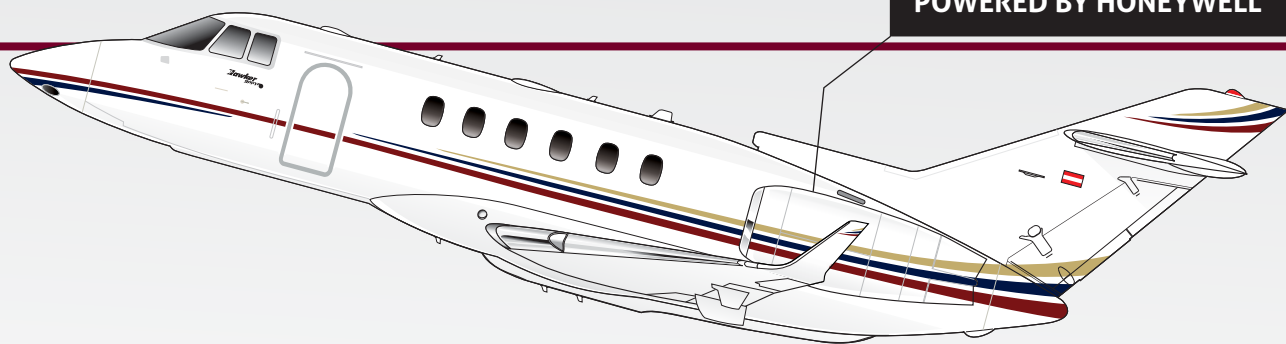

# MIDSIZE CABIN

## Hawker Beechcraft

POWERED BY HONEYWELL

| Performance              | Hawker 900XP            |
|--------------------------|-------------------------|
| Range                    | 5,232 km                |
|                          | mid range               |
| Long range cruise speed  | Mach 0.70 (745 km/h)    |
| Mmo                      | Mach 0.80               |
| Cabin dimensions (L/W/H) | 6.50 / 1.83 / 1.75 m    |
| SEATS                    | 08                      |
| ENGINES                  | Honeywell<br>TFE731-50R |

DURABILITY. COST-EFFICIENCY.  
BEST-SELLER.

Probably the best mid-size business jet currently built, the Hawker 900XP comes from the best-selling bizjet series in the world. Launched at NBAA 2006, introducing winglets and Honeywell’s newest TFE731-50R engines with improved performance at high altitude and hot climate, the 900XP has a 13% range increase over the Hawker 850XP and lower operating cost.

In addition to the proven reliability and legendary comfort, the Hawker 900XP flies smarter with the intuitive Collins Pro Line 21 avionics system.
