

**We combine tradition
with innovation!**

Vehicle construction | Mechanical engineering

Aiming high for our customers

Welcome to FMG Fahrzeugbau | Maschinenbau GmbH, your flexible partner for support systems, crane and vehicle superstructures and everything that goes with them. In addition to custom-made products and special machine construction, we can also shine with our expertise in welding technology and hydraulics as well as repairs. Our motivation and passion is to realise your ideas!

More than 70 years ago, our company founder Karl Maier sen. laid the foundation for our successful development. Today, we are an interna-

tional industry specialist for the planning, design and manufacture of support systems and superstructures for all well-known crane and vehicle manufacturers.

Our recipe for success is as obvious as it is simple: We respond to the wishes of our customers, deliver handshake quality and give them a fixed contact person. No wonder then that they like to come back, and we are always happy to receive new exciting projects.

We look forward to hearing about your wishes and requirements!

We look forward to talking to you

Martin Schenner und Christian Prammer

Crane superstructures

For Unimog, trucks and road-rail vehicles, we plan, manufacture and assemble special and custom bodies such as interchangeable systems, crane, front or rear cable winches, auxiliary loading beds, tipping platforms, crane support systems (200°/360°) and much more.

In addition, we also expand your vehicles with:

- Car/truck trailer couplings
- Toolboxes
- Lifting work baskets (EN 280)
- (Tipping) platforms
- Grab or clamshell buckets
- External start sockets
- and much more

Crane accessories

Our TÜV-approved crane accessories range from various lifting work baskets to crane arm extensions, mountain supports and tilting devices and on to clamshell buckets with a capacity of up to 1,000 litres.

Our crane accessories also include:

- Lifting work baskets (weight: 130–280 kg) with a load capacity of 300 kg (for 2 persons plus payload)
- Quick-change systems for superstructures
- Stanchions
- Platforms
- Parking devices

Support systems

So that you can stand safely on any surface and in any terrain, we are active in support frame construction to design individual support systems and parking devices for you.

We differentiate depending on the requirements:

- Special support
- X-support
- Additional support

Service technology

FMG is an Austrian service company for ZAGRO 2-way devices on the MB-UNIMOG. We also reliably carry out inspections and approvals for all your vehicles for both road and rail.
